EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Gehris on June 21, 2006.

The application has been amended as follows:

Claim 3 (currently amended): The method as recited in Claim 1 further comprising producing the nitrous gases using a storage-type catalytic converter, the catalytic converter adsorbing the nitrogen monoxide, nitrogen dioxide, dinitrogen monoxide or gaseous mixtures thereof from exhaust gas of an internal combustion engine of the motor vehicle for concentration and desorbing the nitrogen monoxide, nitrogen dioxide, dinitrogen monoxide or gaseous mixture thereof prior to the passing step.

Claim 5 (currently amended): The method as recited in Claim 1 further comprising using the fuel after the passing step in a cold-start phase of an internal combustion engine of the motor vehicle.

Art Unit: 1714

2. The following is an examiner's statement of reasons for allowance: the claims are allowable because the prior art fails to teach or suggest the claimed fuel conditioning method for internal combustion engines.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
